About This Game

Oknytt is a point-and-click adventure game where the player takes the role of a small, seemingly insignificant creature, leading it through a dark world riddled with obstacles to help it find a place to belong. The game takes place in a Norse medieval world and contains a number of beings and areas inspired by Swedish folklore.

Oknytt's gameplay is comprised of classic point-and-click puzzle solving combined with the usage of four runes located at the bottom of the screen. These runes can be activated at any time to trigger various changes and events in the area around the protagonist. Each rune has a specific element tied to it which have different areas of use depending on what can currently be seen in the environment.

Figuring out what the runes can be used for and how to utilise their affect on the environment together with the items at your disposal is key to you being able to progress through the game world.

Features

- Manipulate the environment around you using elemental forces
- A unique art style inspired by the famous Swedish painter John Bauer
- Experience and collect lore about creatures and monsters from Scandinavian folklore
- Fully voiced by the talented Brian Hall

-
- 6-7 hours of puzzle solving

keeps freezing and crashing.

game play not too great up till now either.. Great Game! Can play it for hours!. I don't have many hours on steam yet, not on Nether Resurrected because 90% of my gametime was on the original nether client.

This is exactly like earlier Nether, but now it's owned by Fredaikis.

The game has already died twice, but I choose to recommend this because the game does have a HUGE potential and until now the new devs have been incredibly active with updates so if they're able to keep it up, I'm optimistic there's a chance.

I find the game extremely enjoyable, because it's very unique in a way. It gives off a really dark atmosphere, while also offering tons of fast paced play. And in the start the game will seem like a struggle, but as soon as you start getting kills, the game feels quite rewarding.

Tho, there's still lots of bugs. Some small, some big, but again, they seem to be actively updating.

Also Id like to mention that this game is heavily focused on PvP where most people, me included, shoot on sight. You might want to kill some monsters for items, but there's sadly not enough content for people to really focus on it. Players are what's valuable.

EDIT:

I want to mention that after about 30 more hours I've made some pretty cool friends just through Nether.. This has possible potential, but right now its kinda boring.

I've played it a little while but after that i could see that it lacked a reason to come back and play it again. It was boring. BUT im not saying it is a Bad game, it's just wiser to wait and see what happens later. Maybe a huge rework, an end goal so you have something to acheive, which is what it lacks right now.

If you like this type of game, without the cars and lack of 'Gameplay', i would recommend Factorio.

There you have an end goal, a hinderance, solutions, creativity, logic; gameplay. good game but when is the next update?

The game looked awesome, started off nicely, fixable bugs.

Then I got run time errors aftr the 5th battle that crashed the game after every battle, game was then unplayable :(. If you like Bomberman (AKA Dynablaster in europe), you'll love this! I am more of a MasterBlaster guy (from Amiga 500 era) but I still love this as a great party game. Developer seems to respond well on discussions, and there are hints that more content is under way.

You'll need 3 friends, 4 controllers, and infinite amounts of time and snacks (and\or booze) with this game. Sure, computer players are there for the lonely gamers, but it ain't the same thing.

I had great fun with my 6 and 13 year old sons, the controls are easy enough for the younger and gameplay is balanced enough for a variety of ages and skills. Impatience is your greatest enemy here, you'll end up blowing yourself up most of the time.. I really enjoyed this game! The art was really nice, and there are tons of possibilities depending on each choice you make. I hope to see more games like this one soon!

Good luck to the developers on their next releases. I'm looking forward to play them!

10/10.. very intersting mod, pls add French army. Great game, and only £1.49 in the summer sale. :). It may be a bumping simulator, but it is a good game. Fantastic Game!! One of the best pozzle games ever!! A+++ DO NOT MISS THIS GAME!!
